IMMUNE FACTORS™

Echinacea · Goldenseal · Berberine
Vitamin C · B-Complex · Astragalus
Mushroom Complex · Black Currant

IMMUNE FACTORS is an extremely comprehensive blend of nutrients, botanicals and mushrooms to support a healthy immune system. **Immune Factors** begins with our high potency B-complex, along with our non-acidic vitamin C – all of which are essential for a healthy immune system. They are also not readily available from the diet and easily depleted by stress and life. We add two standardized extracts of Echinacea, along with extracts of Goldenseal, Berberine, Astragalus and Black Currant. All of these plant-based extracts have been used for centuries to optimize immune system function and modern research has validated their benefits. We also add our unique, proprietary blend of organic immune supportive mushrooms, including Turkey Tail, Reishi, Chaga, Maitake, Shiitake, Cordyceps, and Agaricus. The combined benefits of all these remarkable ingredients make **Immune Factors** a uniquely powerful opportunity to naturally support immune system function.

IMMUNE MUSHROOM COMPLEX

ORGANIC FULL-SPECTRUM

Turkey Tail • Reishi • Chaga • Maitake
Shiitake • Cordyceps • Agaricus

IMMUNE MUSHROOM COMPLEX is a balanced, comprehensive blend of seven mushrooms traditionally consumed by those seeking to support their immune system. Our **Immune Mushroom Complex** delivers an organic blend of both mycelium (below-ground parts) and fruiting bodies (above-ground parts) from **Turkey Tail, Reishi, Chaga, Maitake, Shiitake, Cordyceps** and **Agaricus**. Mushrooms are neither plant nor animal, but are classified as fungi. They have been an important part of the human diet and in traditional health practices since prehistoric times, especially in Asia, where mushrooms have long been valued for their culinary, nutritional and health-promoting benefits. Our unique full-spectrum blend of mushrooms was carefully selected based upon their long history of traditional use to support healthy immune system function, as well as modern scientific support. Mushrooms are rich in numerous bioactive compounds present in both the mycelium and the fruiting body. However, much of the immune-enhancing activity is due to the presence of polysaccharides. Mushroom polysaccharides (in particular beta-d-glucans) help to promote healthy immune system response while supporting the immune system's natural defense mechanisms. Our **Immune Mushroom Complex** offers a high-quality, comprehensive mushroom blend of both mycelium and fruiting bodies to provide the immune system support benefits from these fascinating fungi.
