A.M. ACTIVATOR™

**Morning Metabolic Support
Cellular Activators · Lipotropic Factors**

A.M. ACTIVATOR is designed as a safe and healthy means of maintaining energy levels while stimulating and supporting fat-burning metabolism without the potentially dangerous Ephedrine-containing herb, Ma Huang. **A.M. Activator** contains thermogenic herbs and natural cellular activators to jump-start your metabolism and facilitate your fat-loss goals. It contains standardized extracts with a history of traditional use in many cultures for promoting energy and a sense of well-being. To further support your weight-loss goals by fighting fatigue and providing calming benefits, we include standardized extracts of Panax (Asian) Ginseng, Eleutherococcus (Eleuthero), and Ashwagandha – adaptogenic herbs with a history of traditional use going back thousands of years. In addition, **A.M. Activator** supplies Chromium to support healthy carbohydrate metabolism and the B-Complex vitamins to maintain energy production and fat metabolism. Most importantly, we add Acetyl L-Carnitine given its central role in all fat-burning metabolism. No fat can be burned without Carnitine transporting it to the location within each cell where it is burned. We also add Carnitine's natural precursors, Lysine and Vitamin C to promote optimum endogenous production of Carnitine. The investment and sacrifice we make when dieting and exercising deserve the best results and the unique combination of ingredients in **A.M. Activator** is designed to safely and gently jump-start fat and energy metabolism.

P.M. RELAXATION™

Evening Metabolic Support
Relaxing & Lipotropic Factors

P.M. RELAXATION is designed to help achieve the greatest benefits from a day of healthy eating and activity by delivering the nutrients and botanicals to support fat metabolism while also promoting a great night's sleep. It is designed to help you naturally relax and prepare for sleep, which often becomes more difficult when dieting and exercising. Healthy sleep is essential to any weight-loss plan, since it is required to recover from yesterday's efforts and to ensure sufficient energy to inspire tomorrow's goals. We include standardized extracts from nature's soothing and relaxing botanicals, including Valerian Root, Passionflower, Chamomile and Hops. We also include the essential sleep hormone Melatonin, but at levels that support, but do not replace, your body's natural production. We also include 5-HTP, for its support of serotonin production, which is associated with sound sleep, positive mood and appetite control. **P.M. Relaxation** also supplies a comprehensive blend of non-stimulant nutrients related to or essential for fat-burning metabolism. Most importantly, we add Acetyl L-Carnitine given its central role in all fat-burning metabolism. No fat can be burned without Carnitine transporting it to the location within each cell where it is burned. We also add Carnitine's natural precursors, Lysine and Vitamin C to promote optimum endogenous production of Carnitine. Just because you're asleep does not mean your body stops benefitting from all your fat burning efforts, which is the reason behind **P.M. Relaxation's** unique blend of ingredients to ensure that today's efforts are well rewarded and that tomorrow's are equally well supported.
