GREEN FOODS COMPLEX™

Wheat & Barley Grass · Chlorella
Spirulina · Blue-Green Algae

GREEN FOODS COMPLEX is a gluten-free blend of the most popularly supplemented green foods, including Wheat Grass and Barley Grass, as well as Spirulina, Chlorella and Blue-Green Algae. These diverse green foods owe their rich color to the chlorophyll they contain and together these five ingredients deliver a comprehensive and concentrated array of vitamins, minerals, enzymes and phytonutrients. More than just natural antioxidants, the ingredients in **Green Foods Complex** help supply your body with protective compounds and building blocks necessary for tissue growth and maintenance, as well as the ingredients required to support a healthy liver. Rather than choose a single “green food,” our **Green Foods Complex** is packed with 100 milligrams each of Barley Grass, Wheat Grass, Blue-Green Algae, Chlorella and Spirulina. **Green Foods Complex** is a complementary blend of two gluten-free cereal grasses, along with the three most important microalgae to help support your cardiovascular, nervous, immune and detoxification systems. Each carefully chosen ingredient contributes the natural benefits of green foods that are so lacking in our modern diet. Although we all try to do our best and eat our “greens” every day, we don’t always succeed and our **Green Foods Complex** makes it convenient and easy to receive the wonderful goodness of those vital, healthy “greens” every day.
