**GREEN TEA EGCG**

and

**CRANBERRY™**

**100 mg EGCG - 200 mg Cranberry**

Urinary Tract Support

Dietary Supplement | **360** Easy-to-Swallow Capsules

**Andrew Lessman's GREEN TEA EGCG and CRANBERRY** combines the diverse health benefits from the world's most popular beverage with one of Mother Nature's most protective fruits. For centuries, Green Tea has been the standard beverage in the healthy Asian diet and its wide range of health benefits have been long associated with its rich content of one of nature's most powerfully, protective polyphenols – Epigallocatechin Gallate (EGCG). Our EGCG is naturally water-extracted, as one would make Green Tea, thus avoiding the chemicals and contaminants of ordinary Green Tea extracts. Our pure Green Tea extract contains no caffeine and preserves the highest levels of protective polyphenols (over 98%), including EGCG at over 50% with each capsule providing 100 mg of EGCG. The health benefits of Cranberries have been recognized for centuries and modern medicine has validated their unique ability to promote the health of the urinary tract, bladder and kidneys. Our Cranberry extract is standardized to deliver optimum levels of protective compounds for the support of the bladder, kidneys and urinary tract. Cranberries also contain high levels of polyphenols (anthocyanins and anthocyanidins) that offer protection to key systems throughout the body. Unfortunately, the bitter flavor of Cranberries limits their consumption to beverages saturated with sugar, which undermines the health benefits of this remarkable berry. Our **Green Tea EGCG and Cranberry** provide all the natural health benefits you seek from these remarkably rich sources of protective compounds without the caffeine or sugar you might seek to avoid.
