Detoxifying Anti-Oxidant | Glutathione Precursor

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's NAC 500 delivers 500 mg of N-Acetyl Cysteine (NAC), an essential glutathione precursor and detoxifying antioxidant that is a uniquely active form of the conditionally essential amino acid cysteine. It is the sulfur in cysteine's "thiol" (sulfhydryl) group that imparts NAC's unique properties, including its critical role as a building block of Glutathione – our body's most powerful, internally-produced protective compound. **NAC** offers important protection to the brain, heart and lungs, but because of its unique detoxifying role, **NAC** provides targeted protection to the hardworking cells of the liver and kidneys making it a sensible part of any internal cleanse or detoxification program. Unfortunately, **NAC** is not readily available from the diet and it cannot be readily produced by the body, so supplementation is a straightforward way of promoting its protective benefits. * Percent Daily Values (%DV) are based on a 2,000 calorie diet.
