# MELATONIN 3

3 mg High Bioavailability Melatonin

Dietary Supplement | **240** Easy-to-Swallow Capsules

**Andrew Lessman's MELATONIN 3** provides metabolically balanced levels of highly bioavailable melatonin to promote restful sleep without "hangover". Melatonin is a naturally produced hormone that is required for healthy, normal sleep. Our **Melatonin** provides metabolically appropriate levels of this protective hormone to gently promote healthy sleep without dependency, hangover or side effects. Restful sleep is essential to recover physically, mentally and emotionally from the demands of daily life; however, the stress and pace of modern life, can frequently interfere with normal sleep. Clinical studies have long shown that melatonin naturally regulates our body's daily circadian rhythm (our internal body clock) which determines when we sleep and wake up. Unfortunately, aging, stress, excessive caffeine, many medications, poor diet, insufficient sunlight, as well as jet lag, shift work and even poor vision can disrupt normal melatonin secretion. Modern life is challenging, but a good night's sleep is the foundation upon which a happy, healthy, high-energy life can be built. Our **Melatonin** is designed to provide metabolically appropriate levels of our highly bioavailable melatonin to naturally support the sleep process and promote a quality night's sleep.
