GARLIC EXTRACT

Deodorized Natural Garlic
High Levels of Allicin & Alliin

GARLIC EXTRACT is a mild, but concentrated extract of deodorized garlic providing all the natural goodness of fresh garlic without the unpleasant aftertaste, stomach upset or odor. It provides highly standardized levels of garlic's most important active sulfur-based compounds: Allicin and Alliin. These beneficial compounds are also garlic's most potentially irritating and unpleasant; however, unlike typical garlic products, we preserve the activity of garlic while also ensuring a mild and gentle experience. Garlic has been a popular spice and traditional remedy for over 5,000 years and today, its health benefits have been confirmed by extensive clinical study. Garlic contains potent protective compounds, while also possessing a well-established role in promoting heart, cardiovascular and immune system health. Despite the extensive benefits of garlic consumption, most Americans avoid it due to its embarrassing odor and unpleasant digestive effects. Our **Garlic Extract** delivers all the goodness of garlic without its unpleasant odor or digestive issues.
