ULTIMATE EYE SUPPORT[®]

12mg Lutein | 6mg Zeaxanthin

High Anthocyanin Bilberry and Elderberry
 Ahiflower[®] Oil | Phosphatidyl Choline

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's ULTIMATE EYE SUPPORT is a comprehensive blend of ingredients to protect the most fragile tissues of the eye and to promote a lifetime of healthy vision. It contains exceptionally high levels of both Lutein and Zeaxanthin – two powerful, protective carotenoids, also referred to as macular pigments, most highly concentrated in the retina and its macular region. Sadly, these two vital carotenoids are all but absent from the leading multivitamins and only recently (and minimally) found in typical eye formulas. Neither Lutein nor Zeaxanthin can be produced by the body, so their benefits require a food or supplement source. Plus, beyond their well-established role in protecting the eye and promoting healthy vision, Lutein and Zeaxanthin levels in the brain have now been shown to be associated with healthy brain and cognitive function, particularly as we age. **Ultimate Eye Support** also includes standardized extracts of Bilberry and Elderberry providing high levels of Anthocyanins to support healthy night vision. We also provide our EGCG-rich Green Tea Extract to further protect the delicate tissues of the eye, along with our Citrus Bioflavonoids and OPC-rich (Oligomeric Proanthocyanidins) Grape Seed Extract to target the eye's micro-circulation. We also add both Phosphatidyl Choline (PC) and Ahiflower[®] Oil to enhance the efficacy of this formula while also protecting the eye's most delicate structures. **Ultimate Eye Support** provides an unsurpassed assortment of Mother Nature's most effective tools to protect the lens, retina and macula while also promoting a lifetime of healthy vision.

Ahiflower[®] is a registered trademark of Technology Crops, LLC.
