GLUTAMINE 500

500mg Glutamine

Free Form Amino Acid

Dietary Supplement | **240** Easy-to-Swallow Capsules

Andrew Lessman's GLUTAMINE 500 is a pure source of the conditionally essential amino acid **Glutamine**. Amino acids play a multitude of roles in the chemistry of our bodies. They are the essential building blocks of all protein-based tissues and are also required for the creation of digestive enzymes and key molecules, such as hemoglobin and the hormones insulin, thyroxin and epinephrine. **Glutamine** is perhaps the body's most versatile amino acid. It is the most abundant amino acid present in muscle tissue and thus essential for healthy skeletal and cardiac muscle function. **Glutamine** also plays a unique role in promoting the healthy mucosal lining and barrier function of the intestines and digestive system. **Glutamine** also plays a special role in the liver, kidneys and throughout our body by promoting nitrogen balance and acid-base balance. **Glutamine** also represents an important energy source for specialized cells of the nervous and immune systems. Most importantly, **Glutamine** is one of only three amino acid building blocks of Glutathione, our body's most powerful, internal, protective compound. In short, **Glutamine's** long list of critical functions has made it one of the most popular amino acids to supplement.
