ULTIMATE EYE SUPPORT[®]

with **ASTAXANTHIN**

12mg Lutein | 6mg Zeaxanthin
4mg Astaxanthin

High Anthocyanin Bilberry and Elderberry
 Ahiflower[®] Oil | Phosphatidyl Choline

Dietary Supplement | **360** Easy-to-Swallow Capsules

Andrew Lessman's **ULTIMATE EYE SUPPORT WITH ASTAXANTHIN** is a comprehensive blend of ingredients to protect the most fragile tissues of the eye and to promote a lifetime of healthy vision. It contains exceptionally high levels of Lutein and Zeaxanthin (essential macular pigments), along with Astaxanthin. All three of these powerful, protective carotenoids are uniquely highly concentrated in the tissues of the eye, particularly the retina and macular region. None of these vital protective carotenoids can be produced by the body, so their benefits require a food or supplement source, yet sadly, you will not find any meaningful amount of all three in any typical diet or eye formula. Plus, beyond their well-established role in protecting the eye and promoting healthy vision, Lutein, Zeaxanthin and Astaxanthin levels in the brain have now been shown to be associated with healthy brain and cognitive function, particularly as we age. This unique formula also includes standardized extracts of Bilberry and Elderberry providing high levels of Anthocyanins to support healthy night vision. We also provide our EGCG-rich Green Tea Extract to further protect the delicate tissues of the eye, along with our Citrus Bioflavonoids and OPC-rich (Oligomeric Proanthocyanidins) Grape Seed Extract to target the eye's micro-circulation. We also add both Phosphatidyl Choline (PC) and Ahiflower[®] Oil to enhance the efficacy of this formula while also protecting the eye's most delicate structures. **Ultimate Eye Support with Astaxanthin** provides an unsurpassed assortment of Mother Nature's most effective tools to protect the lens, retina and macula while also promoting a lifetime of healthy vision.
