# ASHWAGANDHA + THEANINE

**Standardized Root Extract  
with Theanine**

**Promotes Relaxation, Focus  
and Balanced Mood**

Dietary Supplement | **360** Easy-to-Swallow Capsules

**ASHWAGANDHA + THEANINE** offers a unique blend of standardized ashwagandha (*Withania somnifera*) root extract combined with L-theanine, to support relaxation and a calming focus. Ashwagandha has long been utilized in traditional Indian Ayurvedic health practices for maintaining general well-being, and improving vitality, for thousands of years. Ashwagandha is one of the most well-known adaptogens, which help to support the body's ability to resist the effects of everyday stress and promote normal physiological functioning during times of stress. In fact, the plant's species name, "somnifera" is Latin for "sleep-inducing", which aptly describes ashwagandha's relaxing properties. Our **Ashwagandha** is especially rich in withanolides, ashwagandha's key beneficial compounds that have been shown to have antioxidant and neuroprotective properties. Modern research supports ashwagandha's ability to help promote healthy levels of the stress hormone cortisol, while helping to balance mood. Theanine promotes the production of the neurotransmitters dopamine and serotonin, which support relaxation and calm. Theanine is often used to reduce the uncomfortable effects of caffeine and to support a relaxed state. Our **Ashwagandha + Theanine** is of the highest quality to ensure the mood-balancing, calm relaxed focus and stress-relieving benefits, while promoting overall well-being and vitality.
