BERBERINE PHOSPHOLIPID COMPLEX

Optimum Absorption & Activity
Blood Sugar and Cholesterol Balance

Dietary Supplement | **240** Easy-to-Swallow Capsules

BERBERINE PHOSPHOLIPID COMPLEX provides a high bioavailability, phospholipid-protein complex of Berberine from a standardized extract of the root of the barberry plant (*Berberis aristata*). Among other benefits, our Berberine is intended to support healthy blood sugar balance and cholesterol metabolism. Traditional medicine has long relied upon Berberine and like so many ancient practices, modern science now recognizes the health benefits of Berberine. Among its many beneficial properties, researchers have studied Berberine's ability to naturally promote healthy blood sugar and cholesterol balance and metabolism. Unfortunately, ordinary Berberine can be harsh to the stomach and very poorly absorbed, so we remedy those issues by complexing our Berberine with natural phospholipids to make it both gentle to the stomach and dramatically more absorbable. This unique phospholipid-protein complex enhances Berberine's bioavailability and utilization thus providing optimum support and benefits in our pursuit of healthy blood sugar and cholesterol balance.
