600 EASY-TO-SWALLOW CAPSULES

Andrew Lessman's FOUNDER'S formula contains more than 3 dozen ingredients, including vitamins, minerals, carotenoids, nutraceuticals and botanicals standardized for key phytonutrients. It is the most comprehensive, as well as the highest potency of Andrew's multi-vitamin multi-nutrient formulas. FOUNDER'S is uniquely pure and provides only the ingredients you desire and no additives of any kind. FOUNDER'S comes as a non-acidic ultra-fine powder in small, easy-to-swallow capsules and despite its high potency is guaranteed gentle even to the most sensitive stomachs. It provides all the benefits you seek with none of the problems associated with ordinary multivitamins. Also, unlike typical multivitamins that ignore the current science, FOUNDER'S is updated constantly to respect both you and the scientific literature. FOUNDER'S is both the purest and mildest high-potency multivitamin available. It provides 2,000 IU of vitamin D3, along with high levels of all the B-complex vitamins, including 2,000 mcg of biotin (the beauty vitamin) and 250 mcg of our unique methylcobalamin (natural coenzyme B12), pyridoxal 5'-phosphate as B6 and 2,000 mcg of our unique 5-MTHF (methyl folate). It includes 1,000 mg of non-acidic vitamin C, 400 IU of natural vitamin E, along with the powerful protection of the carotenoids lutein (24 mg), lycopene (6 mg), zeaxanthin (5 mg) and astaxanthin (4 mg).

FOUNDER'S provides Andrew's personal balance of high potency nutraceuticals and ultra-standardized botanicals:

**Coenzyme Q-10 (CoQ10)** is essential for all energy production and also provides unparalleled cellular protection. Required at high concentrations in all key organs (heart, brain, liver and kidneys). CoQ10 levels unavoidably decrease with age, stress, medications and even physical activity.

**Resveratrol** is a protective polyphenol that has long been the focus of extensive anti-aging research. It is among nature's most powerful protective compounds.

**Turmeric** standardized for curcuminoids and delivered as a phospholipid complex to ensure maximum benefits and soothing support to our joints, liver and brain.

**Citrus Bioflavonoids**, including Hesperidin and Rutin, are powerful protective compounds that support healthy circulation and enhance the benefits of Vitamin C.

**Bilberry Extract** protects the delicate structures of the eye and supports healthy vision, particularly at night.

**Apple** extract has long been respected as an extremely rich source of uniquely protective polyphenols.

**Alpha Lipoic Acid (ALA)** is the "universal antioxidant" given its fat and water solubility. ALA can protect fragile cellular structures, including those in the liver and brain. ALA promotes glutathione synthesis – the body's most powerful protective compound. ALA levels inevitably decline with age, stress and medications.

**Epigallocatechin Gallate (EGCG)** from Green Tea is its most powerful protective compound supported by centuries of traditional use and decades of scientific research.

**Pomegranate (40% Ellagic Acid and Punicalagins)** is considered the sacred fruit. Standardized to deliver the highest levels of its key protective compounds.

**Milk Thistle** standardized for silymarin and provided as a phospholipid complex for maximum bioavailability and support and protection of our hard-working liver.

**Grape Seed and Pine Bark** extracts are rich sources of oligomeric proanthocyanidins (OPC).

**Broccoli Sprout** is the richest source of protective compounds among cruciferous vegetables.
